

# Con-Test Laboratory Offers Online Status Reporting!

**Con-Test Analytical Laboratory** has been working over the past two years to offer *online status reporting* and *downloadable reports*. We have made this investment to be able to partner with clients on future projects and service your company to the best of our ability. We are proud to announce that this project is complete! Con-Test now offers an interactive data interface! Once you're set-up, we can post your electronic reports for you to view online at your own leisure. All you need is to be set-up with a log-in ID and password and this service is available to all approved personnel now! Clients can view the status of in-house projects, download completed reports, and actually see our internal status report from the LIMS system. This is updated three times daily so you can get accurate and immediate information. Call us now at 413-525-2332 to be shown a demonstration!

Con-Test has online status reporting and downloadable reports! View reports online, check due date and see which parameters are complete or pending! All online at our website:
